“PROGRAM MANAGEMENT FOR THE CONSTRUCTION INDUSTRY”

To whom it may concern:

I have had the pleasure of working with Olympia Structures & Farshad Charmforoosh for the past few years; both in personally assisting him with major projects, as well as on a consultant basis.

Mr. Charmforoosh is someone you would want “sitting on your side of the table”. His attention to detail and voracity when it comes to negotiations, contract knowledge and understanding construction means & methodology are invaluable to whomever he extends his services to.

Whether it be on the pre-construction (developing proformas and/or value engineering), construction (negotiating and/or holding General Contractors accountable for performance), or post-construction (proper closeout and/or forensic studies), he is worth investing in when it comes to the overall integrity of a successful project.

If you are looking for a “go-to” Company that will guard and protect your interests and investments, Olympia Structures is well worth investigating, and in my estimation, a necessary “insurance policy” to guard against any potential construction industry misfortunes at any point during the construction process.

Please give Olympia Structures a call...

Sincerely,

Dennis Desmarais
